SECTION 1: THE GROWTH ENGINE

Every professional services business runs on one formula, whether the founder knows it or not:

$$\text{Revenue} = N \times B \times F$$

This formula structures everything in this playbook. Every activity you do, every meeting you take, every article you write should improve at least one of these three variables. Growing all three simultaneously creates geometric growth.

What Each Variable Means

- **N (Network Size):** Developers, project managers, building owners, and government agencies who know your practice exists. For most early-stage practices, this sits around 50–80. Target: 200–300.
- **B (% Buyers):** The percentage of your network who actually appoint you or shortlist your firm. For young practices, this is typically 2–3%. Target: 5–8% through deeper trust and better qualification.
- **F (Average Fee):** Your average project fee. Many practices undercharge because they compete on individual tenders instead of building retainer relationships. Moving from one-off projects to developer panel appointments or annual consultancy can multiply this number.

The Compound Effect

Scenario	Network (N)	Buyers (B)	Avg Fee (F)	Revenue
Current state	70	2.5%	RM 30,000	RM 52,500
12-month target	250	6.5%	RM 75,000	RM 1,218,750

Same founder. Same team. Same expertise. The difference is a system that deliberately grows all three variables instead of hoping the phone rings.

The Trust Equation

Trust is the mechanism that converts N into B. People buy from professionals they trust:

$$\text{Trust} = (\text{Credibility} + \text{Reliability} + \text{Intimacy}) \div \text{Self-Orientation}$$

- **Credibility:** Your qualifications, certifications, client portfolio, published work, professional endorsements.

- **Reliability:** Do you deliver when you say you will? Consistency in small things builds enormous trust.
- **Intimacy:** Does the client feel safe telling you the real problem?
- **Self-Orientation (keep LOW):** Is your first instinct “how do I upsell?” or “what does this client actually need?” The client can feel the difference.

> *Key insight: Most firms over-invest in Credibility while ignoring Intimacy and Self-Orientation. The firms that win aren’t always the most qualified — they’re the ones clients trust most.*

How Trust Gets Weighted by Personality

Style	Trusts Through	Your Approach
Director (fast-paced, task-focused)	Credibility + Reliability	Be concise. Deliver results. Don’t waste their time.
Socialiser (fast-paced, people-focused)	Intimacy + Credibility	Build personal rapport. Show enthusiasm. Be visible.
Relater (slow-paced, people-focused)	Intimacy + Reliability	Be patient. Don’t rush. Show you care personally.
Thinker (slow-paced, task-focused)	Credibility (data-heavy)	Provide evidence. Be thorough. Let them analyse.

Four Layers, One Playbook

This document integrates four frameworks into a single workflow:

- **Layer 1 — The System:** What activities to do and when. How to grow N × B × F. (Rain Making)
- **Layer 2 — The Philosophy:** Who to be in every interaction. Show don’t claim. Listen before solving. (The Trusted Advisor)
- **Layer 3 — The Personalisation:** How to deliver Layer 1 using Layer 2 calibrated to each person’s style. (The Platinum Rule)
- **Layer 4 — The Content Engine:** What to publish, where to distribute, and how to use content as a sales tool. (They Ask, You Answer)

SECTION 2: MINDSET & IDENTITY

Before tactics or strategy, rewire how you think about selling. This section is conversational because mindset isn't a checklist — it's something you internalise over time.

Sales = Survival (Founder Edition)

If you don't sell, the practice doesn't exist. Whether you sell direct or through referral networks, you are the growth engine. The sooner you accept this as a core part of your professional identity, the sooner your practice starts growing.

Lack of Time Is No Excuse

You're genuinely busy — delivering programmes, designing content, managing clients. Everyone who succeeds at marketing is equally busy. The difference isn't available hours — it's what you treat as urgent versus important.

Delivering a workshop feels urgent because there's a date. Writing a LinkedIn article doesn't feel urgent because nobody's waiting. But that article, published consistently over six months, puts you in front of decision-makers who have never heard of your practice.

The Numbers Game

- **Cold approaches to get one meeting:** ~15–20
- **Meetings to get one engagement:** ~3–5
- **Proposals to get one PO:** ~2–3

Work backward from your revenue target. Three outreach attempts per week. Completely manageable — but only if you do it consistently.

The Emotional Roller Coaster

The emotional swings are amplified because the practice is yours. When a big engagement stalls, it feels personal. When work comes through a referral partner, it feels like a half-win.

When you lose, don't spiral — debrief, learn, move on. When you win, celebrate. Notice when a stalled deal affects your motivation for outreach. Notice when a win makes you complacent. Both are traps.

Production Mindset vs Marketing Mindset

Stop Maximising Billable Time at the Expense of Marketing

The professional who always chooses delivery over marketing is optimising for this month at the expense of next quarter.

Marketing Time Is Investment, Not Waste

On average, 70% of the buying decision is made before a prospect ever talks to you. That means the blog post, the LinkedIn article, the case study on your website — that's where the sale actually happens. The meeting just confirms a decision your content already influenced.

Content Never Sleeps

A blog post about leadership training costs works at midnight when an HR director is researching options before a budget meeting. It works on public holidays. It teaches 1,000 people at once. The time invested compounds in ways that workshops cannot.

You're Not a Pest

By touch 3 or 4 of your outreach sequence, your instinct will be "I'm bothering this person." Most people aren't annoyed by professional, courteous follow-up — they're just busy.

Selling IS Practising Your Profession

When you help an HR director see that their team's performance issue is a leadership gap rather than a skills gap — that IS your expertise applied to diagnosis. You're not selling. You're doing what you do best.

Porpoising and the Alice Trap

> *Porpoising: the radical swing from too much work to too little, caused by stop-start marketing. The fix: always have at least one marketing activity running, no matter how busy you are.*

> *The Alice Trap: getting so busy delivering that you never transition to selling. Always have marketing underway, no matter how much delivery work is in progress.*

Your Credibility Stack

Credibility is expertise plus presence. Your stack, in order of impact:

1. Professional Registration — LAM, BQSM, IEM, or RISM registration. Board of Architects licence. These are the credentials that get you past the first gate in any government or GLC tender.
2. Methodology Credentials — GBI Facilitator, BIM Manager certification, QLASSIC assessor, Green Mark. The credentials your clients check for beyond basic registration.
3. Project Portfolio — when a developer hears you've done projects for recognised names, their brain processes "credible" faster than any qualification.
4. Domain Knowledge Depth — be the most knowledgeable person in the room about your specialisation. When you explain cost implications or design solutions in a way that helps them understand their project risk better than they did before, nobody is thinking about which university you attended.

5. Visible Enthusiasm — when you light up talking about sustainable design, value engineering, or construction methodology, that passion is a credibility signal that can't be faked.

> *When the qualification question comes up: state your experience, certifications, endorsements, and client list — then move on. Defensiveness is self-orientation.*

Sayings to Keep in Your Head

- "It's about the client, not about me."
- "Who am I thinking about right now?"
- "The answer is a better question."
- "The problem is rarely what the client said it was at first."
- "I don't have to prove myself every 10 seconds."
- "Relax — I know more than I think I know."
- "Am I claiming trust or demonstrating it?"
- "If my gut tells me something's wrong, talk about it."

SECTION 3: GETTING KNOWN

One-to-many activities that build reputation. These grow N and B simultaneously. Core principle: show, don't claim.

The Big 5: What to Write About (Forever)

Five types of content consistently drive the most traffic, leads, and trust:

Topic	Why It Works	Example
Cost & Pricing	Every client researches fees first. The practice that answers honestly wins trust.	"How Much Does a QS Practice Charge for a Mixed-Use Development in Malaysia?"
Problems & Limitations	Addressing what can go wrong builds more trust than claiming everything is perfect.	"5 Common Cost Overrun Triggers That Most Developers Miss"
Comparisons	Clients compare anyway. Be the one who helps them do it honestly.	"In-House QS vs External Consultancy: Which Delivers Better Cost Control?"
Best in Class	People search "best" before every appointment. Own that conversation.	"What Makes the Best Cost Consultant? 7 Things Developers Should Look For"
Reviews	Honest assessments of methods, standards, and approaches build authority.	"Our Honest Review of BIM-Based Cost Estimation vs Traditional Methods"

For any service you offer, ask five questions: What does it cost? What are the problems? How does it compare? Who's the best? What are the reviews? That generates dozens of topics on demand.

The Content Engine: Write Once, Distribute Everywhere

One blog post per week answering a Big 5 question. That single post becomes the source for every other channel:

- **Blog post:** The comprehensive piece. Lives on your website, builds SEO, discoverable by developers searching "quantity surveyor cost Malaysia" two years from now. The only channel you fully own.
- **LinkedIn:** Retell the same topic as a story or project insight. Don't copy-paste — reframe with a punchy opening. "Last month a developer called us in after RM 4.2M in variation orders. Here's what went wrong."
- **Facebook:** Same as LinkedIn version. Share in relevant Malaysian groups where developers and project managers gather.

- **WhatsApp Channel:** Not the full post. Pull one insight and make it snackable. Links to the full blog post. Read rates in Malaysia are 85–95%.
- **Quarterly email mailer:** Curate the best blog posts from the quarter into a single email.
- **Tender handout:** Print or PDF your best blog posts. Include in proposals. Send before meetings. Zero extra effort.

One hour writing the blog post, one hour distributing across channels. Two hours total. 50 posts in a year gives you more educational content than probably every competitor combined.

> *Repurpose across time. The blog post written in March becomes a proposal appendix in July, feeds into the October mailer, and gets updated next February. Every piece of content has a 12-month lifecycle.*

The Ostrich Trap

"We'd better not address pricing on the website. Let's wait until we're face-to-face." But when was the last time you looked up how much something costs and the company didn't answer? You left and found someone who would.

The topics that feel most uncomfortable — how much your fees are, what the limitations of your approach are, honest comparisons between in-house and external consultancy — are precisely the topics developers are researching right now. The practice that answers them builds trust. The one that hides loses the appointment.

Writing & Publishing (Beyond Blog)

The blog is your primary channel. But some writing targets audiences the blog won't reach:

- PAM, BQSM, IEM, or RISM publications and bulletins
- REHDA newsletters (reaches developers directly)
- CIDB publications (construction industry angle)
- Your company blog with proper SEO

Speaking

Topics That Generate Leads

- "Value Engineering: A Practical Framework for Project Managers"
- "Building a Design-to-Cost Culture from Project Inception"
- "GBI Compliance: What Malaysian Developers Need to Know"

> *Give the speech → write up as blog post → distribute through the content engine. One effort, five outputs.*

CPD Sessions / Industry Workshops as Lead Generation

- Run free/low-cost workshops for developers and project managers on cost management or design coordination
- Limit to 15–20 attendees for quality interaction
- Use real (anonymised) project data
- During breaks, have 1-on-1 conversations about their upcoming projects
- Follow up personally within 48 hours with every attendee
- Track: who attended → who engaged → who has an upcoming project → opportunity in CRM

The Conversion Funnel

Workshop attendee → asks about upcoming project → feasibility study (RM 10–25K) → full appointment (RM 50–200K) → construction phase services → DLP consultancy → next project with same developer.

Social Content That Builds Credibility

DON'T	DO
"We completed the design for a 30-storey mixed development. Contact us for your next project!"	"This is what happens when M&E coordination gets skipped in the design phase. This RM 4.2M variation order was entirely preventable. Most developers don't know this risk exists until it's too late."

The first is advertising. The second demonstrates expertise.

Direct Mail & Email (Quarterly Cadence)

Each quarter, curate the best Big 5 blog posts into a themed email:

- **Q1:** "2026 Building Compliance Checklist" — covering UBBL amendments, fire safety, and accessibility requirements
- **Q2:** Case study mailer — anonymised results showing cost savings and VO prevention
- **Q3:** Regulatory update — changes in building regulations, GBI requirements, or CIDB standards
- **Q4:** "Planning Your 2027 Project Budget" — timed to developer budget season

Every mailer gives something useful. None say "contact us." That's the "go first" principle.

SECTION 4: BUILDING & MAINTAINING YOUR NETWORK

Who You Need to Know

Category	Examples	Why They Matter
Direct Buyers	Developers, project directors, building owners, government project managers	They appoint your firm or shortlist you
Influencers	Architects (for QS), QS (for architects), project managers, site supervisors	They recommend firms during consultant selection
Referral Partners	Complementary consultancies, contractors, real estate agents, bankers	They encounter your prospects on every project
Gatekeepers	Procurement departments, tender committees, quantity surveyors (for sub-consultants)	They control access to appointments
Knowledge Sources	CIDB contacts, association leaders, planning authorities	They tell you about upcoming projects early

Trade Associations

Join and get active. Volunteer for committees:

- PAM / LAM — volunteer for technical committees. Meet architects and developers across the industry
- BQSM / RISM — QS and surveying networks with direct access to procurement decision-makers
- IEM — engineering networks, especially for M&E consultancies
- REHDA — developer association gives access to the people who appoint your firm
- CIDB — construction industry contacts from contractors to government bodies

Network Quality

Target 200–300 contacts. Assess each across four dimensions:

- **Purchasing power:** Can they hire you?
- **Access & influence:** Connected to decision-makers?
- **Information value:** Early opportunity intelligence?
- **Referral willingness:** Actively recommend you?

> *The Oscar Principle: always introduce people who can help each other. Connectors get called first.*

Style-Adapted Relationship Maintenance

Style	Maintenance Approach	Frequency
Director	Short, results-focused updates.	Monthly email, quarterly call
Socialiser	Social engagement. Comment on posts. Invite to events.	Bi-weekly touchpoint
Relater	Personal check-ins.	Monthly personal message
Thinker	Technical content. Research, data.	Quarterly deep-value email

SECTION 5: THE SALES PROCESS

Getting the Meeting

The 4-Touch Outreach Sequence

- **Touch 1 (Day 1):** LinkedIn connection — brief, specific, no pitch
- **Touch 2 (Day 2–3):** Email — value-focused
- **Touch 3 (Day 4–5):** WhatsApp — conversational, brief
- **Touch 4 (Day 7–10):** Phone call — now warm

> *"I noticed [Developer] recently acquired a new land parcel. Projects at that scale typically benefit from early-stage cost planning. Would 15 minutes be useful to share what we've seen work on similar developments?"*

The Learning Call

> *"I'm researching how Malaysian developers approach consultant selection for mixed-use projects. Could I get 15 minutes of your time to understand your process?"*

Tracking Your Numbers

Record every outreach attempt and its outcome in your CRM. After 3 months, you'll know your actual conversion ratios.

Assignment Selling

Most practitioners book a meeting and show up. Assignment selling means sending the prospect educational content BEFORE the meeting so they arrive informed, pre-qualified, and already trusting you.

How It Works

Old approach: Prospect calls, asks for a fee proposal. "Sure, I'll send it over." No idea how educated they are. You compete purely on fee.

New approach: "Of course I'd love to discuss the project. But before we meet, I'm going to send you two things: our guide on what to look for when appointing a cost consultant, and a case study showing how early-stage cost planning saved RM 3M on a similar project. Have a look — it'll make our conversation much more productive."

90% of prospects say yes. For the 10% who refuse: if a prospect won't spend 10 minutes becoming informed, they're almost certainly buying on price alone.

What to Send

This is where your Big 5 blog posts become sales tools:

- **Fee inquiry:** Send your “How Much Does a QS/Architect/M&E Consultant Cost?” blog post
- **Comparing firms:** Send your comparison article
- **First-time client:** Send your guide to choosing the right consultant
- **Concerned about VOs:** Send your article on cost overrun prevention
- **Any prospect:** Send a relevant case study from a similar project type

Why Teaching Gives You Authority

The rights of a teacher are greater than those of a salesperson. A teacher can assign homework. A teacher can set expectations. Assignment selling shifts the dynamic from selling to teaching.

The Follow-Up After Sending

Call before the meeting: “Did you get a chance to go through the guide I sent?” If yes: the meeting starts at a different level. If no: “Take 10 minutes, it’ll make our meeting more productive.”

Running the Meeting

Pre-Meeting Preparation

- Check their style in CRM
- Research their company and challenges
- Prepare first five minutes for their style
- Set intention: “It’s about them, not me.”

The First Five Minutes

6. Personal link: something specific about their organisation.
7. Agenda statement: “I’d like to understand your approach and share how we’ve helped similar organisations.”
8. Positioning statement: Lead with a RESULT.
9. Stage-setting anecdote: One brief real story. Under 30 seconds.
10. The Big Question: “What’s the biggest challenge you’re facing?” Then listen.

Questions That Surface Real Needs

- “What’s your biggest concern about this project right now?”
- “How do you currently manage cost control during design development?”
- “Have you experienced significant VOs on recent projects?”
- “What does your timeline look like for consultant appointments?”

- "If you could change one thing about how your last project was managed, what would it be?"

Buying signals:

- **"We've had cost blowouts on the last two projects"** — pain point with budget attached
- **"Our current QS only does bills"** — competitor weakness, advisory gap
- **"Planning submission is in 3 months"** — timeline pressure = urgent
- **"The board wants better cost visibility"** — top-down mandate

> *The "What else?" technique: The real problem usually surfaces second or third, not first.*

Framing the Problem

DON'T	DO
Client: "We need a QS for this project." Vendor: "We can do that. Here's our fee scale."	Adviser: "QS appointment is the starting point. What you're really managing is cost certainty across a 36-month development cycle. The BQ is just one tool. The real value is a cost management framework that prevents the RM 2–5M in variation orders that kill your project margins."

How Framing Shifts by Style

- **Director:** Business impact in one line. "This isn't a QS fee. It's a RM 3M VO prevention investment."
- **Socialiser:** Vision and status. "Imagine presenting your board a project that came in under budget."
- **Relater:** Reassurance. "You've been managing costs well. This is about adding a layer of visibility that catches issues before they become VOs."
- **Thinker:** Technical logic chain. Walk through the cost risk points at each RIBA stage, quantify historical VO rates, and show the control framework methodically.

Naming and Claiming

When you sense something unspoken, name it. Use softening phrases:

- "I might be reading this wrong, but it sounds like the real concern isn't the fee — it's whether the consultant will actually prevent cost surprises."
- "At the risk of overstepping, I'm noticing that the bigger issue might be design coordination between disciplines rather than individual consultant performance."

- "You've probably thought about this already, but the compressed timeline combined with the design complexity creates specific cost risk windows."

Envisioning the Future State

Help them see what "good" looks like before you ask for commitment:

"Imagine if at every design review meeting, you had a live cost dashboard showing the impact of every design decision on your total budget. You'd know exactly where you stand, what's changed since last review, and what decisions need to be made this week. That's what a proper cost management framework looks like after 3 months."

How the vision resonates by style:

- **Director:** The outcome. "No cost surprises, no VOs, predictable margins."
- **Socialiser:** The status. "Your board presentation shows a project delivered under budget with full cost traceability."
- **Relater:** The stability. "Smooth, predictable project flow. No emergency cost meetings. No blame sessions."
- **Thinker:** The logic. "Data-driven cost decisions at every stage. Full audit trail from estimate to final account."

Giving Advice Without Losing the Client

DON'T	DO
"Your approach is fundamentally flawed. You should have addressed this years ago."	"Based on what we've seen, there are areas that could use attention. Let me walk you through options and you decide what makes sense."

Advise clients like you're helping your parents — respectful, honest, always their decision.

The Disarmament Principle

When a prospect asks "why should I choose you?" the instinct is to pitch. The better move: disarm first.

"To be frank, we may not be the best fit. You've seen our proposal and others. Based on everything you've heard, do you feel we're the right choice?"

If they hesitate, you've surfaced a real objection. If they say yes, they've sold themselves.

The Assignment Selling Follow-Up

After the meeting, send targeted content instead of "just checking in":

"During our meeting, you mentioned concerns about [specific issue]. I've attached an article explaining [relevant topic]. Give it a look and I'll call Thursday to discuss."

Winning the Work

Style-Adapted Proposals

Style	Format	What They Read First
Director	2 pages max. Price upfront.	Price and timeline
Socialiser	Visual. Testimonials.	Who else you've worked with
Relater	Detailed process. Reassuring.	Implementation process
Thinker	Comprehensive. Methodology.	Technical approach

Universal proposal principles:

- Lead with THEIR problem statement using THEIR words
- Show you understood their constraints
- Present the service that fits their situation
- Include 2–3 anonymised case references — evidence, not claims
- No surprises — everything discussed verbally first

Handling "Price Is Too High"

- **Director:** What you get for the money. "Our fee includes cost planning from inception, not just post-design bills. The next cheapest firm starts at tender stage — by then, 80% of cost decisions are locked in."
- **Socialiser:** Relationship reassurance. "I hear you. Let me adjust the scope. The quality of advice won't change."
- **Relater:** Process comfort. "Let's look at a phased appointment that aligns with your project milestones."
- **Thinker:** Cost-benefit data. "Here's the comparison: our fee vs. average VO exposure on similar projects."

When You Lose

- Debrief within 48 hours
- Push past vague reasons to find the real issue
- Track patterns in CRM
- Don't burn the bridge — follow up in 6 months

SECTION 6: DELIVERING & GROWING

During Delivery

- Confirm meetings 24 hours before. Send agendas.
- Provide same-day summaries after every project meeting or site inspection.
- Don't inflate findings. If costs are tracking well, say so. The client who reads "on budget" trusts your warnings when costs DO escalate.
- Include a "Decisions Required" section in every report — make it easy for them to act.
- Help them USE your deliverables — coach them on presenting cost reports to their board, prioritising VE options, defending budget requests.

Style-Adapted Behaviour During Delivery

- **Director (Project Director):** Brief them first. "Report will be ready by Friday. Key issues: X, Y, Z."
- **Socialiser (Friendly Architect):** Build the relationship. Discuss design intent. They'll give you better project context and early design change warnings.
- **Relater (Client's Rep):** Ask before requesting documents. Explain why you need them. Don't disrupt their process.
- **Thinker (Technical Manager):** Show your methodology. Explain your cost benchmarks. Let them verify your assumptions.

The 4 Levels of Client Relationship

Level	Description	Revenue Implication
1. Service Provider	You do what you're asked.	One-off, easily replaced
2. Capable Expert	They trust your judgment.	Repeat work, some flexibility
3. Valued Resource	They seek your input beyond scope.	Annual contracts, premium pricing
4. Trusted Adviser	They involve you in strategy.	Multi-year partnerships, referrals

Post-Delivery Follow-Up Cadence

- **30 days:** "How did the board respond to the cost estimate? Any questions I can help clarify?"
- **90 days:** "Design development is underway — have the structural changes affected the budget envelope we set?"
- **Ongoing:** Share relevant updates. "New CIDB cost index published — might affect your material cost assumptions. Happy to brief your team."

The Portal Service Strategy

The diagnostic entry project for built environment firms is the feasibility study, preliminary cost estimate, or design audit. It's affordable, answers an immediate question, gives you access to the entire project team, and naturally leads to full appointment.

The Conversion Path

Feasibility study (RM 10–25K) → findings reveal cost risks → full appointment (RM 50–200K) → construction-phase services → defect liability period consultancy → next project with same developer.

Growing Accounts

The Trust-Transfer Problem

Trust is personal, not institutional. Three types of expansion:

- **Expand (deeper, same person):** Upgrading from basic to comprehensive. Easiest.
- **Broaden (same service, new person):** Getting introduced to a different decision maker. Medium.
- **Diversify (new person, new scope):** Expansion across divisions or locations. Hardest.

Asking for Referrals

Timing: only after delivering results they're happy with:

- **Director:** Direct. "Who else in your network is planning a development?"
- **Socialiser:** Enthusiastic. "You've seen the savings — any other developers who'd benefit?"
- **Relater:** Gentle. "If any colleagues are starting new projects, I'd welcome an introduction whenever it feels right."
- **Thinker:** Factual. "Based on the results, similar projects would benefit from early cost planning. Any you'd recommend?"

Price Increase Conversations

- **Director:** Direct. "Fees adjusted due to [reason]. New rate is RM X. Same team, same quality."
- **Socialiser:** Frame positively. "We've invested in BIM capabilities and expanded our team. Better deliverables. New rate reflects the upgrade."
- **Relater:** Reassuring. "Everything stays the same — same team, same process. The adjustment is modest."
- **Thinker:** Full breakdown. "Staff costs up X%, software licences up Y%. New rate of RM Z. Attached: comparison showing value per project stage."

When to Turn Down Small Work

Every small one-off you accept keeps your average fee low and occupies time that could pursue full project appointments. Know the difference between a feasibility study (strategic entry point — worth it) and a small scope variation that has no path to a larger appointment (usually not worth it unless you need cashflow).

SECTION 7: YOUR 12-MONTH PLAN

Growth Formula Targets

Variable	Current	3-Month	6-Month	12-Month
N (Network)	___	___	___	___
B (% Buyers)	___	___	___	___
F (Avg Fee)	RM ___	RM ___	RM ___	RM ___
Revenue	RM ___	RM ___	RM ___	RM ___

The 3 Things to Do Tomorrow

11. Write one Big 5 blog post about your core service. Start with cost or problems — the topics nobody in the built environment wants to touch publicly. Distribute through the content engine.
12. Apply to speak at one PAM, BQSM, IEM, or REHDA event in the next 3 months. A room full of developers is a room full of buyers.
13. Send one value-add email to 10 developer contacts — not a pitch, but useful content (compliance checklist, cost benchmark, blog post link). Demonstrate the “go first” principle.

QUICK REFERENCE

Designed for pre-meeting prep. Print this section and keep it in your bag.

60-Second Style Identification

14. Fast-paced/assertive (Direct) or slow-paced/reserved (Indirect)?
15. Task-focused (Guarded) or people-focused (Open)?

	Task-Focused	People-Focused
Fast-Paced	DIRECTOR: Decisive, impatient	SOCIALISER: Enthusiastic, big-picture
Slow-Paced	THINKER: Analytical, cautious	RELATER: Patient, consensus-seeking

Style Warnings

- **Socialiser:** They'll say yes enthusiastically then delay paperwork. Get commitments in writing.
- **Relater:** "Let me think about it" may mean no. Gently check.
- **Thinker:** May keep asking for data to delay decisions.
- **Director:** If you're slow, they move on. Respond same day.

Pre-Meeting Checklist

- Check their style in CRM
- Research: company, recent changes, context
- Prepare first five minutes for their style
- Set intention: "It's about them, not me."

Self-Test Before Any Marketing Material

- Am I telling them I'm good, or showing evidence?
- Is this about my company, or the client?
- Would I trust a company that said this?
- Is there a specific result I could use instead of a general claim?
- Am I giving something valuable, or just asking for something?
